

SI 339: Ibrahim Rasheed Final Portfolio

In a conversation with Professor van Lent on Thursday, I conveyed my desire to not write a portfolio by hand after the one I was currently writing (iarashee.github.io/Portfolio/index.html) was not appealing to me and that I would prefer to use an HTML/CSS template, as long as I gave respect to the original developers. She said this would be allowed so long that I showed competency by not only being able to manipulate the HTML and CSS, but also adding more of my own designs. In the below bullet points are a list of changes and additions I have made. I'll be happy to explain it and run through it person; or even re-do it if this is not agreeable.

Site designed by FreeHTML5.co.

Expected grade: 165/180; I made significant improvements, changes, and additions from template but understanding if the use of a template would grading difficult.

- Site wide/CSS:
 - Changed color scheme
 - Shortened line height and container sizes
 - Overridden bootstrap schemes such as buttons
 - Added functionality for dropdown buttons and customized to fit themes
 - Adjusted “active” button attribute
 - Adjusted padding, margins, and other positioning for accessible and readable responsive views
 - Reformatted footer for efficiency
- Index
 - Removed containers
 - Reformatted for efficiency and simplicity theme
- Portfolio
 - Changed flavoicon-like images
 - Changed color schemes of images
 - Inserted grid format for a resume page
- Blog: All Posts
 - Added dropdown menu
 - Introduced buttons to navigation rather than links
 - Add distinguishing border between posts for accessibility
- Blog: Books
 - Added grid containers to showcase books in clean format
 - Utilized 8 images (including icons)
 - Activated CSS animation for buttons
 - Linked buttons to outside references
- Blog: Original Work
 - Added embedded PDF document
 - Adjusted document in grid format for full and easy reading and interaction
- Contact
 - Adjusted ICE form for theme of site
 - Added Subject field
 - Elongated fields for usability (longer form for subject and message)

- Form submit drafts email successfully

I understand if my use of a template may be uncomfortable, so please feel free to reach out if any explanation is needed.
